📍 Dehradun

SUMMARY

A Computer Science Engineering student with a passion for front-end web development and Java programming. With skills in HTML, CSS, and JavaScript, I create user-friendly, responsive websites. I focus on designing intuitive interfaces and optimizing website performance. Java is my preferred programming language for tackling complex problems and developing efficient applications. I am constantly seeking opportunities to expand my knowledge and stay updated with industry trends and technologies.

EXPERIENCE

Member

Google Developer Student Clubs GEU

📅 07/2023 - Present   📍 Dehradun

A Tech Community to enable students to Learn, Collaborate, and Build.

- Cloud Computing fundamentals
- Google Cloud's innovative solutions and real-world applications
- Problem-solving skills
- Generative AI

Web Developer Intern

Bharat Intern

📅 10/2023 - 10/2023   📍 Remote

Bharat Intern is a dynamic company specializing in offering top-tier internship opportunities across various fields.

- I owned the design process, taking functional and technical requirements and translating them into detailed architecture and design.
- Troubleshooted real-time issues and devised effective solutions to ensure smooth user experiences.

EDUCATION

Bachelor of Technology - BTech, Computer Science

Graphic Era Hill University

📅 01/2022 - 12/2026

PROJECTS

Portfolio website

📅 03/2024   📍 Remote

My own portfolio website, which showcases my skills and achievements as a programmer, Creating my own website has taught me how to design user interfaces and incorporate responsive design principles. Furthermore, I have also gained experience in Git and version control systems, which are critical tools for collaborative software development.

- The portfolio website effectively showcases skills and achievements, attracting potential employers and clients. User interface design and responsive design principles demonstrate proficiency in creating adaptable web applications.
- Experience with Git and version control systems.

Quiz Game

📅 12/2023   📍 Remote

The quiz game project aims to develop a web-based application that engages users in a fun and interactive quiz experience.

- The application offers a diverse range of quiz categories, enhancing knowledge and enjoyment, while also incorporating real-time leaderboards and rewards for increased engagement and competition.
- Responsive design and multiplayer options ensure an interactive and inclusive quiz experience across all devices.

To-do list

📅 11/2023   📍 Remote

The To-do list application project is focused on developing a web or mobile platform that allows users to efficiently manage their tasks and organize their daily activities.

- The application enhances productivity and time management by allowing users to add, edit, and delete tasks, with intuitive design and integration with calendars for effective daily activities.
